

Tower Report

Tower documentation should consist of the following as a minimum;

- 1- Cover Sheet – The cover sheet will contain a picture of your tower made from your video showing the tower intact and all tower specifications, ie. Weight, height, base width, top width, supported load and efficiency in a table. It will also include your class ranking.**

- 2- Tower Report – The report will contain 4 sections, each section will be at least ½ of 1 page in length. The 1st will discuss the towers failure. From your video determine what failed and describe the failure in detail. The 2nd will discuss in detail all positive aspects of your towers design and construction and what you feel you did right with the project. The 3rd will discuss all negative aspects of your towers design and construction and what you feel was wrong or could be improved. The 4th will discuss what you think could be done by me to improve this project.**

- 3- Tower Data Sheet – Completed with all calculations.**

- 4- Tower Drawing – Your tower drawing with the wood estimate.**

All pages will include your name, period and the date.
